# TRULUX<sup>™</sup> CUSTOM CUT PROGRAM

### Configure Tunable CCT Cut Tape Light in Three Easy Steps

- Determine the length of tape for your application. Tape light total length must be cut on the specified cutting increments for each type of tape.
- 2. Specify lead wire length (3ft standard with assembly charge, additional lead wire at an extra cost of \$1 per foot) and run quantities.
- 3. Specify quantities for controls and accessories at bottom of page.

LED-DR100-12		
LED-DR150-12	(150W)	

# TRULUX<sup>™</sup> Tunable CCT Custom Cut Cheat Sheet

With our easy to use cheat sheet, we've done most of the guess work for you! If your application length falls between specified cuttable lengths, we recommend rounding to the nearest cut increment for optimum efficiency. Three foot lead wire comes standard, but you can also specify additional feet if needed. Be sure to consider voltage drop when determining tape light and lead wire length.

### **Lead Wire and Voltage Drop**

All of our 12V tunable tape light includes a 3ft SPT1 22AWG lead wire that is soldered to the end of the tape and sealed with shrink tubing. Please see our voltage drop chart for more information on acceptable tape and lead wire lengths.
